

SEO / GEO / AEO Audit Report

QUICK AUDIT

2026-08-10

Claude Skill and Plugin by Alex Labat

Executive Summary

me.readwith.io is a strong personal-brand portfolio for Hemendra Tripathi (Technical Lead / AI Engineer). Technical on-page basics are largely in place: solid title, Person + WebSite JSON-LD, Open Graph, canonical, robots, and dense outcome-driven case-study copy (~1,400 words). The urgent keyword-boost gap is Answer Engine readiness — almost no question-shaped headings, no FAQ schema, and hire-intent long-tails are under-targeted. Meta description is slightly long (172 chars), OG description is keyword-thin versus the main description, and product visuals ship as CSS mocks (ready=false) so image search/alt equity is weak. Biggest opportunity: add a hire-intent FAQ + tighten title/description/H2 keyword targeting around “voice AI technical lead” and “hire AI engineer.”

Dimension	Score	Status	Key Takeaway
SEO	7	On Track	Solid foundation; keyword placement & image SEO are the levers.
GEO	7	On Track	High factual density + Person schema; anonymous quotes weaken trust.
AEO	4	Needs Work	No FAQ/HowTo schema; headings are not question-shaped.
Combined	18	/30	Keyword boost = SEO polish + AEO FAQ layer.

Pages Audited

URL	Page Type	Notes
https://me.readwith.io	Homepage (SPA)	Single-page portfolio; all sections audited
https://me.readwith.io/robots.txt	Robots	Allow:/; Disallow:/legacy/; sitemap pointed
https://me.readwith.io/sitemap.xml	Sitemap	Valid; single homepage URL
https://me.readwith.io/manifest.webmanifest	PWA manifest	Present; uses SITE description
https://me.readwith.io/opengraph-image.jpg	OG image	200; 1200×630 JPEG
https://me.readwith.io/twitter-image.jpg	Twitter image	200; mirrors OG asset
https://me.readwith.io/Hemendra_Tripathi_Resume.pdf	Resume PDF	200; linked from nav/CTAs

SEO Analysis — 7/10

Technical On-Page

Signal	Finding	Status
Title tag	“Hemendra Tripathi — Technical Lead · AI Engineer” (48 chars). Clean, brand-first. Missing stronger hire/voice modifiers for keyword boost.	Good
Meta description	172 chars — strong proof points but over ideal 150–160; risk of SERP truncation.	Needs Attention
Heading hierarchy	Single H1 = name only. Role keywords live in body/eyebrow more than H2s.	Needs Attention
URL / canonical	HTTPS self-canonical https://me.readwith.io. Hash-section SPA.	Good
Robots / indexability	index, follow; /legacy/ disallowed; sitemap listed.	Good
Image alt text	Work mocks default ready=false (CSS frames). Weak image SEO surface.	Needs Attention
Open Graph / Twitter	Complete with 1200×630. og:description thinner than main meta description.	Needs Attention
Keywords meta	Includes hire AI engineer, voice AI engineer, Callin.io, Twilio — useful as intent map.	Good

Content Quality

Signal	Finding	Status
Word count / depth	~1,400 words: case study, metrics, experience, capabilities.	Good
Primary keyword clarity	Entity + role clear; secondary hire/voice terms not systematically reinforced in title/H2/FAQ.	Needs Attention
Semantic coverage	Twilio, Telnyx, SIP, RAG, Pinecone, Supabase, Stripe, healthcare/real estate.	Good
Freshness	Job dates present; no page last-updated stamp.	Needs Attention

Structured Data

Signal	Finding	Status
--------	---------	--------

Person schema	name, jobTitle, email, address, sameAs, knowsAbout, alumniOf, worksFor.	Good
WebSite schema	Present with publisher Person.	Good
Schema gaps	No Person.image; no FAQPage; no ProfilePage.	Needs Attention

GEO Analysis — 7/10

E-E-A-T

Signal	Finding	Status
Author / entity	Named person, location, education, current role at Appspundit Infotech · Callin.io.	Good
About / bio	“Off the Record” narrates teaching → freelance → 1,500-customer voice platform.	Good
Testimonials	Strong quotes but name/org empty — anonymous social proof weakens AI citation trust.	Needs Attention
sameAs graph	GitHub + LinkedIn + Callin.io in schema and UI.	Good

AI Synthesis

Signal	Finding	Status
Factual density	1,500+ customers; ~20% LLM cost; ~420ms TTFT; 30+ closed prospects; 42% placement lift.	Good
Clear claims	Hero definitional sentence is citable.	Good
Comprehensiveness	Answers who/what well; hire/engagement FAQs unanswered in extractable form.	Needs Attention

AEO Analysis — 4/10

Signal	Finding	Status
Direct answer blocks	Hero is definitional but not under a question H2.	Needs Attention
FAQ schema	Not present.	Missing
HowTo schema	Not present.	Missing

Question headings	H2/H3 are labels, not natural-language questions.	Missing
Long-tail questions	No coverage for hire-intent / “how does routing work” queries.	Missing
Conversational copy	Strong in case study + demo sections.	Good

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
Critical	Add FAQ section + FAQPage JSON-LD for hire/voice-AI questions (40–60 word answers).	AEO	Medium	Snippets + AI citations
High	Tighten meta description to ≤160 chars; enrich og:description with voice AI / hire keywords.	SEO	Low	Immediate SERP/share lift
High	Reinforce keywords in H2/eyebrow (e.g. “Voice AI Case Study”) without diluting brand H1.	SEO	Low	Role-query relevance
Medium	Attribute Signal quotes; add Person.image (portrait) to JSON-LD.	GEO	Low–Med	E-E-A-T / trust
Quick Win	Ship real PNGs with keyword-rich alts (MockVisual ready=true) for product frames.	SEO	Low	Image/alt equity
Medium	Optional pillar note on multi-LLM voice routing to expand beyond one URL.	SEO/AEO	High	Long-tail rankings

What's Working Well

- Person + WebSite JSON-LD with sameAs, knowsAbout, education, and worksFor — unusual quality for a personal site.
- Outcome-dense Callin.io case study is highly citable for GEO.
- Title, canonical, robots, sitemap, OG/Twitter large image, and HTTPS correctly wired.
- Clear entity + hire CTA with live agent demo as differentiator.
- Semantic keyword coverage across voice AI, billing, telephony, and enterprise verticals already rich in body copy.

Recommended Keyword Targets

1. **Primary:** Hemendra Tripathi — Technical Lead AI Engineer
2. **Commercial:** hire AI engineer / hire technical lead / voice AI technical lead
3. **Expertise:** multi-LLM orchestration, voice AI engineer, usage-based billing, Twilio Telnyx SIP
4. **Brand/product:** Callin.io case study, AI voice agents

Core Web Vitals, mobile rendering lab data, and backlink/domain authority were not measured in this Quick Audit — use PageSpeed Insights and Search Console for those.
