Claude Skill and Plugin by Alex Labat

Executive Summary

Hemendra Tripathi's portfolio (target: me.readwith.io) is a content-rich single-page site with strong proof points. Launch blockers (sitemap, robots, canonical, OG image, Twitter card, Person schema, branded icons) are now implemented in the codebase. Remaining gaps: FAQ/HowTo for AEO, real imagery, and post-deploy Search Console. Domain returned HTTP 500 at audit time — complete DNS, then index.

Scores

SEO	7/10 On Track — Technical foundation shipped; verify live after DNS
GEO	7/10 On Track — Strong E-E-A-T + Person schema
AEO	5/10 Needs Work — Add FAQ schema + question headings
Combined	19/30 — — Deploy !' index !' iterate AEO

Implemented This Sprint

- Full Metadata API (metadataBase, canonical, OG, Twitter, robots)
- /sitemap.xml + /robots.txt (blocks /legacy/)
- Dynamic.opengraph-image, icon, apple-icon
- Web manifest + Person/WebSite JSON-LD
- A11y: skip link, full-name H1, reduced-motion, agent dialog/live regions
- GEO lede with entity name in hero paragraph

Priority Recommendations

CRITICAL	Point DNS !' Vercel; set NEXT_PUBLIC_SITE_URL; verify robots/sitemap
CRITICAL	Google Search Console — add property + submit sitemap
HIGH	Add FAQ block + FAQPage schema
HIGH	Real images in public/images/ + MockVisual ready={true}
MEDIUM	Trim meta description; add freshness cue
QUICK WIN	2–3 question-style H2s for snippets

What's Working Well

- Citable metrics (1,500+ customers, " 20% cost, ~420ms TTFT)
- Clear entity/role positioning
- E-E-A-T: experience, education, contact, testimonials, sameAs
- Distinctive brutalist brand system

Post-Deploy Checklist

1. DNS me.readwith.io !' Vercel project
2. Env: NEXT_PUBLIC_SITE_URL=https://me.readwith.io
3. Curl-check /robots.txt, /sitemap.xml, /opengraph-image, ld+json in view-source
4. Google Search Console !' submit sitemap
5. Share link to verify OG preview
6. Optional: Bing Webmaster + IndexNow
7. PageSpeed Insights for Core Web Vitals

Accessibility / UX / Design

A11y: Skip link, complete H1, agent typing status, summary dialog labelling, prefers-reduced-motion added.
Remaining: modal focus trap/Escape, mobile nav, verify steel-on-paper contrast for small labels.

UX copy: Keep “Read the case study !”, “Talk to my AI agent”, “Email me”. Email-as-button is clear. Consider SEO-friendly “About” alias for “Off the Record”.

Design: Hero brand hierarchy is correct. Brutalist tokens (paper/ink/org/steel) are coherent. Document focus rings and button states next.

Cannot assess without live tools: CWV, backlinks, DA — use pagespeed.web.dev after deploy.
